Description: MultiMode 8-HR is an atomic force microscope which is well suited for imaging in both air and fluid. Heating to 250C, cooling to -35C with temperature control accessories. Nanothermal analysis for local polymer phase transition temperatures up to 350C.. Atomic resolution electrochemistry with AFM, STM, and SECPM. Invent your own mode by accessing and modifying any signal, high or low voltage. A large variety of standard operating modes and many capabilities enable the MultiMode 8-HR AFM system to characterize everything from mechanical to electrical properties
