Proper Citation: PlaForNEA (RRID:SCR_022027)

Description: Software allows estimating growth and production at stand level of main forest species implanted in Argentine Mesopotamia such as Pino taeda, Eucalyptus grandis, Pino elliottii and Araucaria angustifolia. Areas for which models were adjusted correspond to province of Misiones, northeast of Corrientes and Concordia in province of Entre R  os.

Synonyms: PLAFORNEA

Resource Type: simulation software, software application, software resource

Keywords: estimating growth and production, forest species, Argentine Mesopotamia

Availability: Free, Available for download, Freely available

Resource Name: PlaForNEA

Resource ID: SCR_022027

Alternate URLs: <https://plafornea.software.informer.com/>

Record Creation Time: 20220421T050138+0000

Record Last Update: 20260810T040809+0000
