Proper Citation: Covaris: CP02 Automated Dry Pulverizer (RRID:SCR_026012)

Description: Covaris cryoPREP Dry Pulverizer enables dry, non-contact cryopulverization of tissue samples in a closed system without the risk of carryover or cross-contamination. The cryoPREP system provides a simple and robust tissue processing method for low and high mass inputs. The specially engineered tissueTUBE is used to process samples and extract biomolecules from a diverse set of tissue samples ranging in mass from 15 mg up to 2 g. Both manual and automated versions of the cryoPREP Dry Pulverizers are available to suit your needs.

Synonyms: Covaris cryoPREP Dry Pulverizers

Resource Type: instrument resource

Keywords: automated, dry, non-contact cryopulverization, tissue samples, closed system,
