Description: Orbitrap LC-MS with EASY-IC (Internal Calibration) mass spectrometer for high-resolution, accurate mass analysis of complex samples, providing detailed information about compounds for identification, quantification, and characterization. Liquid Chromatography-Mass Spectrometry combines the separation power of liquid chromatography with the mass analysis capabilities of mass spectrometer. Orbitrap mass analyzer offers high resolution and accuracy, enabling the separation and identification of even closely related compounds. Internal Calibration uses internally generated ions to improve mass accuracy.
