Proper Citation: Fred Hutchinson Cancer Center Collaborative Data Services Core Facility (RRID:SCR_027586)

Description: Core provides data-related support to cancer researchers by offering services like study design consultation, data management, programming, and access to patient data. Its purpose is to help researchers develop and execute studies, manage data, analyze results, and ultimately accelerate cancer research by making large, complex datasets more accessible and usable. CDS team uses evidence-based standards and effective quality assurance procedures from project design to study end. All CDS study staff are HIPAA-compliant and certified in Human Subjects and Good Clinic Practice training.

Resource Type: access service resource, core facility, service resource

Keywords: ABRF, data-related support, cancer, evidence-based standards, effective quality assurance procedures, project design, study end,
